About

This project is a simple music library as a homework in the context of our computer science studies. For more details about the source code please check out the documentation: <https://vivi90.github.io/ene> (Also available as PDF download: <https://vivi90.github.io/ene/ene.pdf>)

Naming

We have named it after the character 'Ene' from the anime 'Mekakucity Actors'.

Usage

Just compile it. Currently it supports only WAV files. The library database is saved in a local SQLite file, called `library.db`.

Features

- Create simple music library
- Play tracks
- Sort tracks by artist, title or genre (ascending or descending)
- Filter tracks by artist, title or genre

Requirements

- Doxygen (only for contribution)

Contribution

Please issue **right after** cloning the following command to use all necessary hooks: `git config --local core.hooksPath .githooks`

Translation

Please take a look at the directory `src/ene/resources/locales`.

Troubleshooting

If you run this application on a Linux operating system, the sound doesn't work, and you get an `LineUnavailableException` in debug mode, then please force Java to use the Pulse Audio system by issuing: `padsp java -jar bin/ene.jar` You need to start this application with the `-d` argument to enable debug infos.

7.27.3.1 getTitle()

```
String ene.views.gui.WindowView.getTitle ( )
```

Returns the title.

Returns

Title.

Since

0.13.0

Implements [ene.interfaces.View< CoreComponentType >](#).

Definition at line 27 of file WindowView.java.

References `ene.views.AbstractView< CoreComponentType >.getCoreComponent()`.

Here is the call graph for this function:

7.27.3.2 render()

```
void ene.views.gui.WindowView.render ( )
```

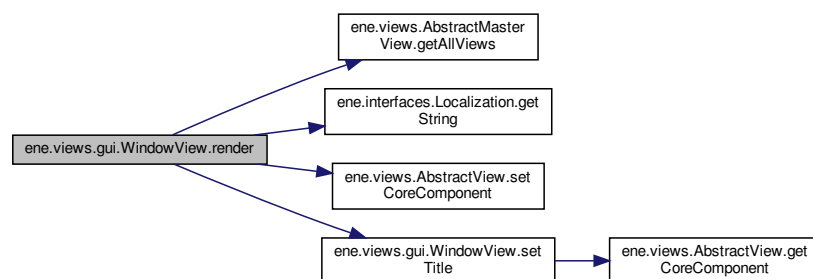

Renders the view.

Implements [ene.interfaces.View< CoreComponentType >](#).

Definition at line 42 of file `WindowView.java`.

References `ene.views.AbstractMasterView< CoreComponentType >.getAllViews()`, `ene.interfaces.Localization.getString()`, `ene.views.AbstractView< CoreComponentType >.setCoreComponent()`, and `ene.views.gui.WindowView.setTitle()`.
